deve The new 2. Diff	lopment of a 100-MVA chief designer for the development was carri- iculties in transpor-	Derschoeneweide "Karl Liebkn transformer with 220 KV and his development order is Dr. led out at the order of the Uting the newly-developed transtatt the transformer be transported by the Rest Germany can on	a test voltage of 100% Walter Blankenburg. T SSR. sformer are being enco sported in a 22-axle d	he untered lepressed
deve The new 2. Diff beca cent	lopment of a 100-MVA chief designer for the development was carriculties in transportuse the USSR demands are car (Tiefladswage) such large-type cars	transformer with 220 KV and his development order is Dr. lied out at the order of the Uting the newly-developed transthat the transformer be transformer by the body transformer by transformer by transformer by transformer by the body transform	a test voltage of 100% Walter Blankenburg. T SSR. seformer are being enco seported in a 22-axle of the cars ley obtain 18-axle cars termany is forced to be	intered
deve The new 2. Diff beca cent	lopment of a 100-MVA chief designer for the development was carri- iculties in transpor- use the USSR demands ar car (Tiefladswage)	transformer with 220 KV and als development order is Dr. led out at the order of the Uting the newly-developed tranthat the transformer be translab. while East Germany can on East G	a test voltage of 100% Walter Blankenburg. T SSR. seformer are being enco seported in a 22-axle of the cars ley obtain 18-axle cars termany is forced to be	intered
deve The new 2.
